USCIS LEARNING EDGE PASSES SIGNIFICANT MILESTONE

LearningEDGE, developed by PowerTrain, issues its one millionth certificate

Landover, Maryland, February 6, 2017 – The learning management system (LMS) developed by PowerTrain for the United States Citizenship and Immigration Services, LearningEDGE, passed the milestone of ONE MILLION COMPLETIONS.

PowerTrain is extremely proud of this accomplishment. Our team has been involved in this project since the beginning and has worked to develop this Moodle-based system into a comprehensive, nationally-used, secure, cloud-based training system.

LearningEDGE has grown from dozens of training courses in its catalog to thousands of courses completed each day. Working as an integrated team with USCIS employees, PowerTrain developed the electronic SF182 through which 17,368 requests for external training were created and managed. As of this announcement, the LMS also tracked 180,070 live (in-person) training enrollments.

“The USCIS LearningEDGE is one of our most heavily used, demanding, and accomplished systems PowerTrain has ever developed.”

Willem Kupper
Director of Information Technology
PowerTrain, Inc.

USCIS began looking for an alternative to their legacy LMS in 2011 and turned to the USALearning program of the United States Office of Personnel Management for assistance. USALearning first awarded PowerTrain a task order to begin the development of the USCIS LearningEDGE in October 2011. The LearningEDGE was meant to be a stop-gap measure to support USCIS online learning and training tracking requirements until the Department of Homeland Security (DHS) could fully implement the Performance and Learning Management System (PALMS) within USCIS in October 2016.

About PowerTrain, Inc. – PowerTrain, a woman-owned small business, uses advanced technologies to support thousands of government and commercial clients on a wide variety of [training](#), [learning management](#), and [human capital](#) solutions. In a rapidly evolving industry where technological adaptability and innovation are critical, PowerTrain has been a trusted source for creative, cost-effective solutions since 1994.
