# VISUALIZE CAREER TRAJECTORIES

With Career Voyager, employees can explore their career journey like never before! They'll have a clear view of their current position and career track, making it easy to visualize where they're headed. If they're curious about other areas within the organization, they can effortlessly compare their path to alternatives that align with their interests.

Plus, they can design their own personalized career roadmap, selecting viable transitions within or between job series to reach their goals. Along the way, they'll access detailed position descriptions, competency and skill requirements, and training options for each role, empowering them to take the necessary steps to advance toward their dream job.

***2/3 of employees have recently considered leaving their job because there aren't enough opportunities for skills development, career advancement, or transitioning to different roles or a new career path.<sup>1</sup>***
